Ajith Nayar — Co-founder & CEO Uma (Umesh) Mahesh — Co-founder & President (Americas) Mahesh Subramanian — founder & President (APAC) Geetha Sham — Director & President (Europe) Other founders/executives reported in company profiles and startup databases.

Products & Solutions

• Large Vision Models (LVM) for surface-agnostic defect and damage assessment • AI& (flagship LVM + LLM hybrid — announced at their 8th anniversary launch) • Automated visual inspection for automotive OEM (end-of-line), finished-vehicle logistics (PDIs), insurance claims automation, aerospace inspections, warehousing & pharma final inspection • Mobile apps and cloud services for inspection workflows, OCR for labels and documents, and real-time pass/fail analytics.

Technology & Capabilities

• Micro-defect detection (claims of detection down to ~50 microns in manufacturing contexts) • Industry-agnostic models trained on large, customer-validated datasets • Integrations with cloud & edge compute, partnerships with AWS/Intel/Nvidia noted in public materials

Recent News & Partnerships (selected)

• AI& launch (announced during CamCom's 8th anniversary celebrations) — positioned as a 24B-parameter LVM with combined LLM capabilities for predict/prescribe/prevent workflows. • Strategic partnership and global deployment with ERGO Group AG / ERGO Insurance for insurance-sector inspections and claims automation. • Multiple regional deployments across Asia, Europe, Middle East and Mexico (per company news and press coverage).

Awards & Recognition

• Multiple startup and innovation recognitions in India and internationally (CamCom materials cite innovation awards and industry recognitions such as NASSCOM-related listings).

Corporate & Registry Data

Sources such as corporate registries and business-data platforms list the registered address, CIN, and company status. The last reported AGM listed in public records was in 2024.
